

Who Rules America?

Professor G. William Domhoff, Sociology Dept., University of California at Santa Cruz

<http://www2.ucsc.edu/whorulesamerica/power/wealth.html>

Table 1: Income, net worth, and financial worth in the U.S. by percentile, in 2010 dollars

Wealth or income class	Mean household income	Mean household net worth	Mean household financial (non-home) wealth
Top 1 percent	\$1,318,200	\$16,439,400	\$15,171,600
Top 20 percent	\$226,200	\$2,061,600	\$1,719,800
60th-80th percentile	\$72,000	\$216,900	\$100,700
40th-60th percentile	\$41,700	\$61,000	\$12,200
Bottom 40 percent	\$17,300	-\$10,600	-\$14,800

From Wolff (2012); only mean figures are available, not medians. Note that income and wealth are separate measures; so, for example, the top 1% of income-earners is not exactly the same group of people as the top 1% of wealth-holders, although there is considerable overlap.
